

This is fully break down the Cricket Player Trading Platform into a detailed Feature Architecture →

We'll go **Module** → **Submodule** → **Features** (with granular details, even small things like profile fields, notifications, risk flags, etc.).

Cricket Player Trading Platform - Feature Architecture

1. User Management Module

♦ Submodules & Features

a) User Profile Management

- Sign-up/Login (Email, Phone, Social, Wallet connect if Web3-enabled)
- KYC Verification (Govt ID, Address, Age restriction ≥ 18)
- Profile Fields:
 - Name, Username, Avatar
 - Favorite Team/Player (for personalization)
 - Contact Info
 - Country & Timezone
 - Linked Bank/UPI/Wallet for withdrawals
- Account Settings:
 - Change password, 2FA (SMS, Google Authenticator)
 - Notification preferences (match alerts, order confirmations, price alerts)

- Privacy settings (public leaderboard visibility toggle)

b) User Tiering & Rewards

- Basic / Premium user tiers
 - Referral Program (Invite friends, get credits/tokens)
 - XP/Level system for gamification
 - Loyalty rewards (season passes, trading fee discounts)
-

2. Trading Module

◆ Submodules & Features

a) Player Marketplace

- Live Player Listings (sorted by match, team, tournament)
- Real-time Price Feed (auto refresh every 2-5s)
- Price Chart (candlestick / line for intra-match, series, season view)
- Player Stats Overlay (runs, wickets, form graph, fantasy points) {***}
- Buy/Sell buttons with quick % options (25%, 50%, 100%)

b) Trade Execution & Order Book

- Buy Order Types:
 - Market Order (instant execution)
 - Limit Order (execute at defined price)
- Sell Order Types:
 - Market Sell
 - Limit Sell

- Short Sell option with margin requirement
- Order Book:
 - Live Bid/Ask spread
 - Depth chart (optional advanced view)

c) Trading Types Integration

- Day Trading (auto close at match end)
 - Swing Trading (multi-day hold)
 - Position Trading (series/season hold)
 - Scalping (per over/per ball)
 - Long/Short Position tracking
-

3. Portfolio & Wallet Module

♦ Submodules & Features

a) Portfolio Dashboard

- Active Positions (PnL real-time updates)
- Historical Trades (filter by date, player, tournament)
- ROI Tracker (% returns, realized vs unrealized PnL)
- Graphs: Profit trendline, sector (batters/bowlers) distribution

b) Wallet & Balance Management

- Fiat deposit (UPI/Bank/Cards) OR Token deposit (if Web3)
- Withdrawals with KYC check
- Transaction history (deposits, withdrawals, fees)
- Margin Wallet (separate for short trades)

c) Risk Indicators

- Exposure % vs total balance
 - Margin Call Alerts (for shorts)
 - Volatility Warning (e.g., player price moving $\pm 15\%$ in 5 mins)
-

4. Match & Data Module

◆ Submodules & Features

a) Live Match Integration

- Match schedule & upcoming matches list
- Live score integration (ball-by-ball API)
- Player performance stats (runs, SR, wickets, economy, catches, milestones)
- Context factors (match stage: Powerplay, Death overs, Day 4 pitch, etc.)

b) Historical Data & Analytics

- Past match stats (per player, per tournament)
 - Player form graphs (last 5 matches)
 - Comparison Tool (Kohli vs Root batting index)
-

5. Dynamic Pricing & Risk Management Engine

◆ Submodules & Features

a) Pricing Algorithms

- Live Match: Runs/wickets per ball impact, milestone boosts
- Swing (Test): Time-decay + pitch deterioration factor

- Position (Series): Weighted average + form consistency
- Scalping: Ultra-volatile tick-level price update

b) Risk Management Controls

- Circuit Breakers: Freeze stock $\pm 20\text{-}40\%$ move
 - Daily Loss Limits per user (optional safety mode)
 - Margin Requirements for shorts (e.g., 150% locked capital)
 - Anti-Manipulation: Prevent mass pump/dump orders
-

6. Community & Engagement Module

♦ Submodules & Features

- **Leaderboard:** Rank by ROI, trading volume, streaks
 - **Achievements & Badges:** "Perfect Over Trader", "Century Catcher" etc.
 - **Follow/Copy Trades:** See influencer or pro-trader portfolios
 - **Community Chat/Forum:** Match-specific chat rooms
 - **Fantasy Combos:** Group players (e.g., "Opening Pair Pack") as a single tradeable unit
-

7. Admin & Operations Module

♦ Submodules & Features

a) Admin Dashboard

- User management (approve KYC, suspend accounts)
- Trade monitoring (real-time order logs, fraud detection)
- Revenue tracking (fees, spreads, commissions)

b) Content & Alerts Management

- Push Notifications & Announcements
- Match/Event banners (IPL final, WC semis)
- Promo codes, offers, referral campaigns

c) Data & Analytics

- Daily Active Traders (DAT), Gross Volume Traded (GVT)
 - User Retention Cohorts
 - Liquidity per match/player
-

8. Notifications & Alerts Module

- Price Alerts (custom % increase/decrease triggers)
 - Match Events: "Kohli 50!", "Bumrah 3 wickets haul"
 - Portfolio Updates: PnL crossing thresholds
 - Risk Alerts: Margin call, exposure warning
 - Marketing Push: New series launch, referral rewards
-

9. Security & Compliance Module

- KYC/AML verification
 - Transaction monitoring for suspicious activity
 - Age-gate (18+ only)
 - Encryption (SSL, DB encryption for sensitive info)
 - Role-based access for admin tools
 - GDPR compliance for user data
-

MVP Priority Feature Set

For **first release (MVP)** keep it tight:

1. User Management (with KYC-lite)
2. Player Marketplace (Day Trading only)
3. Portfolio Dashboard
4. Live Match Integration
5. Basic Dynamic Pricing Engine
6. OMS (Buy/Sell/Short)
7. Risk Management (basic limits + circuit breakers)

Everything else (leaderboards, scalping, season trading, AI advisor, combo packs) = **Phase 2 & beyond.**
